

Week 2: Flowchart & Game Logic Planning

1. Game Objective

Project Title: 2D Zombie Survival Game

Objective:

The player controls a character that must survive against continuously spawning zombies. The player can move around the map and shoot zombies. The game ends when the player's health reaches zero.

2. Game Rules

❖ **Rule 1**

Player starts with:

Health = 100

Score = 0

❖ **Rule 2**

Player can move using:

W = Up

A = Left

S = Down

D = Right

(or Arrow Keys)

❖ **Rule 3**

Player can shoot bullets.

Bullet hits zombie

Zombie dies

Score +1

❖ **Rule 4**

If zombie touches player:

Health -10

❖ **Rule 5**

When:

Health = 0

Game Over

3. Game Components

Player

Properties:

Position (X,Y)

Health

Speed

Actions:

Move

Shoot

Zombie

Properties:

Position (X,Y)

Speed

Actions:

Move toward player

Bullet

Properties:

Position (X,Y)

Speed

Actions:

Move forward

Destroy zombie

4. Game Flowchart

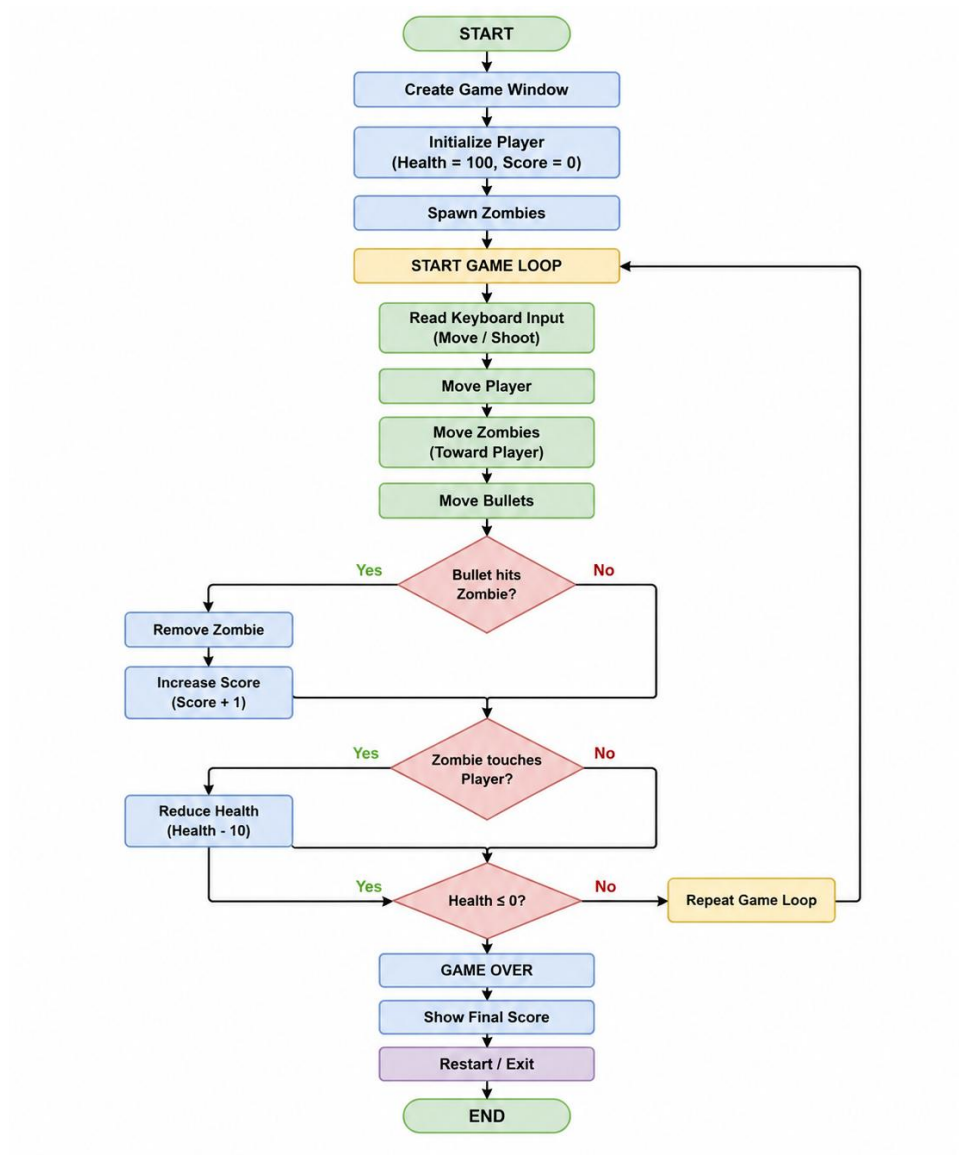

Fig: 2D Zombie Survival Game Flow Chart.

5. Basic Class Planning

Main Class

Starts the game

Creates the game window

Player Class

Stores player information

Handles movement

Handles shooting

Zombie Class

Stores zombie information

Handles zombie movement

Bullet Class

Stores bullet information

Handles bullet movement

Game Panel Class

Draws all objects

Updates the game screen

Runs the game loop
